Lean Six Sigma Champion

2022

Training offer from ICG

LEAN SIX SIGMA CHAMPION

Lean Six Sigma Champion training focuses on executive managers who support process improvement projects and manage the overall program. The goal of the course is to introduce the basics of Lean and Six Sigma methodologies, individual tools and techniques, and ultimately explain the role and responsibilities of the champion throughout the program.

Managers who participate in the training are carefully prepared for their new roles as project sponsors (champions) and for their regular collaboration with project managers (Green Belt or Black Belt).

The one-day training includes a practical workshop to identify appropriate opportunities and prioritize them. Overall, the goal is to create a strong company infrastructure and culture that engages management in regular process improvement within the company.

Facts about training:

- 1 day training at the client's premises
- Printed training materials for each participant.
- Support in the form of post-training consultations to ensure the right projects are selected.
- A workshop on selecting the right projects is included in the training.
- Consolidation of outputs and preparation of final workshop presentation.
- Quality guarantee - we refund 25% of the course price if you are not satisfied

You will learn to:

- Understand the Lean Six Sigma philosophy (process improvement principles and understanding of the DMAIC cycle).
- Identify opportunities in processes.
- Hints and tips for managing Lean Six Sigma projects from the position of Project Champion.
- Find the best ways to implement Lean Six Sigma into the day-to-day operations (create the infrastructure).
- Implement effective and proper communication of the Lean Six Sigma methodology.

AGENDA: LEAN SIX SIGMA CHAMPION

1. What is Lean Six Sigma and DMAIC - principles

2. Using Lean and Six Sigma methodologies - what types of problems we solve

3. How to identify appropriate and inappropriate Lean Six Sigma projects

4. Practical examples + participants simulate typical problems and their solutions

5. The role of champions (sponsors) of improvement projects and cooperation with project leaders

6. Lean Six Sigma tools and examples of use

7. Lean Six Sigma deployment in an organisation - recommendations and risks

8. Strategic workshop - finding suitable projects including prioritization

WHY ICG?

- 1 Methodology based on practical examples, project data from 50 consultants across Europe.
- 2 Experienced trainers, they have delivered over 85 LSS training sessions in the last 24 months.
