Agile in Business

AGILE IN BUSINESS

Understanding how to operate with agility is key to manage the challenges of day-to-day work, as well as to embark in ambitious projects, such as digital transformation. Our goal is to offer you an understanding on how agile methods and tools work and be ready to start working Agile on your next project.

Agility is a State of Mind, not a methodology.

People benefit: they understand the underlying need for changing the way of working and see the benefits of managing own projects in a different manner, to cope with ever changing requirements. We work with changing the mindset as well, to foster autonomy and intrapreneurial spirit.

Organisation benefit: increase speed to market and customer satisfaction by providing more customer value and a quicker response to customer demands; better risk mitigation and resource allocation, while increasing employee engagement.

Program includes exercises, videos and real life simulation to understand how agile methods work and can be implemented in practice. Depending on the level of your Agile acumen, we can calibrate for beginners or more advanced teams.

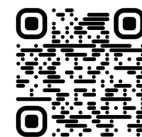

The program can be configured depending on the group or specific requirements.

Participants: max. 15 Persons (classroom or online)

Cost: starting from ~~1.400~~ 900 EUR
