CREATIVITY AND ARTIFICIAL INTELLIGENCE (AI) 2

This workshop is designed for all employees who wish to utilize and enhance their creative strength using artificial intelligence (AI).

Redefine Creativity: AI, your Muse for the Modern Age.

People benefit: learn to harness their creative potential by leveraging artificial intelligence (AI) tools. Creativity is an integral component of a growth-oriented mindset, contributing to individual well-being, longevity, and self-esteem. Through this program, attendees will develop the skills necessary to effectively integrate AI into their daily professional activities, enhancing their ability to innovate and problem-solve within their roles.

Organisation benefit: organizations that foster a culture of creativity not only see an uptick in productivity and efficiency but also in employee satisfaction. Individuals who engage in creative processes contribute positively to the workplace ambiance and help shape a dynamic organizational culture. The integration of Artificial Intelligence (AI) into these environments amplifies these benefits by enhancing both the productivity and the quality of the outputs generated by such creative individuals..

Program includes exercises to understand the creative functioning of our brain, scientific theories for understanding and developing human creativity, AI tools for individual and group creativity, neuroscience of creativity, and pitching and development of ideas with the support of AI.

The program can be configured from 0,5 to 2 days depending on the group or specific requirements.

Participants: max. 15 Persons (classroom or online)

Cost: starting from ~~1.400~~ 900 EUR
